

Network Fine Tuning Oplocks Option

Microsoft has reported Oplocks can cause problems with an Access database. This document describes how to set this option for use with an Access database. If the Oplocks settings exist, make sure the value is correct. If the settings do not exist, add the option as described below.

ANY CHANGE YOU MAKE TO THE REGISTER IS YOUR RESPONSIBILITY.

Select Start
Select Run
Select regedit

Workstation

HKEY_LOCAL_MACHINE
SYSTEM
CurrentControlSet
Services
MRxSmb
Parameters

Edit
