

Import Tax Rate by Zip Code

April 18, 2007

Summary

Sales tax rates may be imported to the Tax Location table in Studio Showroom from a text file. The import feature is compatible with the Basic Sales Tax Database from Tax Data Systems.

The sales tax database is available at www.taxdatasystems.com

Delete Zip Codes

Tax Rates are stored in the Studio Showroom Tax Location table by zip code. The current Tax Location records by zip code should be deleted before current tax rates are imported. Select the Delete Tax Rates button on the Tax Location Screen. All Tax Locations between 00000 and 99999 will be deleted.

Import Zip Codes

The tax rate table must be imported from a text file in the following folder

StudioShowroom/salestax/tax_basic.txt

To import the tax rates by zip code, select the Import Zip Codes button on the Tax Location Screen. The tax rates will be added to the Tax Location table.

Florida Zip Codes

To import the tax rates by zip code for Florida, select the Florida Zip Codes button on the Tax Location Screen. The tax rates will be added to the Tax Location table.

The state tax rate will be added to Tax Percent 1

The county tax rate will be added to Tax Percent 2

\$5,000 will be added to Luxury Limit

WARNING

A zip code may be in more than one tax location (county) and the tax locations (counties) may have different sales tax rates. Only one sales tax rate will be imported for the zip code. Only use this feature if you accept responsibility for this situation.
